**PROJECTS**

[ILINX eForm](#)

Develop a dynamic form system that allows users to create, edit, and submit online forms with dynamic fields. The form should be able to adjust its content based on user actions and previously entered data.

[Quang Ngai OCOP Website](#)

Develop a website to support local businesses and households in promoting and selling region-specific products on the OCOP platform. Technologies Used: HTML, CSS, JavaScript, React, Laravel, MySQL.

[Quiz Website Development for Pham Van Dong University](#)

Developed a quiz system to support the creation and management of online quizzes for students. The system includes features for question management, quiz creation, automatic grading, and result analysis. The goal of the project is to help teachers easily track and assess student performance, while providing an interactive and convenient learning experience for students. Technologies Used: PHP - jQuery - MySQL
